

Authors	Poster
Tayyebah Bakhshi, Tony Zhang, Mahdi Abu-Omar	Preparation of Sustainable Polar Aprotic Solvents from Biomass
Curt J. Bougher, Mahdi M. Abu-Omar	Lewis Acid Assisted Hydrogen Atom Transfer to Manganese (V)-Oxo Corrole via Valence Tautomerization
Kelsey Cantwell and Mahdi Abu-Omar	Novel Molybdenum (VI) Dioxo Catalysts, Their Reactivity, and Kinetics
Tim Carroll, Guang Wu, Gabriel Ménard	Investigating the Proposed Reduction-Coupled Oxo Activation Mechanism using Model VPO Complexes
Ali Chamas, Zachary Jones, Long Qi, and Susannah L. Scott	Operando MAS NMR on the Hydrogenolysis of Lignin and Lignin Model Compounds
Hongyi Chen	One-Pot Synthesis of Benzene-Fused Medium-Ring Ketones: Gold Catalysis-Enabled Enolate Umpolung Reactivity
Megan Chui, Gustavo Metzker, Grace Hubbell, Christopher M. Bernt, Anthony T. Tran, Peter C. Ford	Enhancing the Reactivity of CuPMOs Towards Desired Products from Lignin Model Compounds
Ala'a F. Eftaiha, Fatima Alsoubani, Khaleel I. Assaf and Abdussalam K. Qaroush	Supramolecular Chemisorption of Carbon Dioxide by Chitin Acetate Oligomer
Thilina Gunasekara, Jungsuk Kim, Silei Xiong, Andrew Preston, D. Keith Steelman, Grigori A. Medvedev, W. Nicholas Delgass, James M. Caruthers, and Mahdi M. Abu-Omar	Synthesis of branched polyolefins by Associative Tandem Catalysis
Clifford Hardy & Alison Butler	Investigating Iron Acquisition in a Hydrocarbon-Degrading Marine Bacterium Through Genome Mining

Camden Hunt, Guang Wu, and Gabriel Ménard	Investigating the Role of Redox Load Distribution in Oxidative Catalysis
Zachary Jones, Jacob A. Barrett, Gao Yu, Jin-ping Zhang, Marcus Foston, Peter C. Ford, and Susannah L. Scott	Evolution of a Heterogeneous Cu-Based Lignin Hydrogenolysis Catalyst in Supercritical Methanol
Megan Keener, Gabriel Ménard	Reactivity and Mechanistic Understanding of Metal-Nitride Complexes for NH ₃ Splitting Chemistry
Marco Lam, and Prof. R. Daniel Little	Electroreductive carbon-carbon bond coupling carried out in a flow reactor
Baoyuan Liu	Catalytic Conversion of Non-food Biomass to Value Added Chemicals: Renewable Carbon from Carbohydrates in Plants
Hao Luo, Ian Klein, Yuan Jiang, Hanyu Zhu, Baoyuan Liu, Hilka Kenttamaa and Mahdi Abu-Omar	Total Utilization of Biomass, Lignin and Carbohydrate: Using Earth Abundant Catalyst
Kothanda Rama Pichaandi, Hashem Amini, Guanghui Zhang, Lara Kaban, Jeffrey Miller, Phillip E. Fanwick and Mahdi M. Abu-Omar	Mechanism of Me-Re Bond Addition to Platinum(II) and Dioxygen Activation by the Resulting Pt-Re Bimetallic Center
Andrew Preston, Jungsuk Kim, Gregori Medvedev, Jim Caruthers, Nick Delgass and Mahdi M. Abu-Omar	Ligand Substituent and Solvation Effects in Single-Site Polymerization Catalysts
Jamie Shaum, David Fisher, Landon Mills, Javier Read de Alaniz Ph.D.	A Nitroso-Mediated Methodology for the Synthesis of Amino-Alcohols
D. Chester Upham, Vishal Agarwal, Josh Matthews, Michael Gordon, Horia Metiu, and Eric McFarland	Taking Carbon Dioxide Out of Fossil Fuel Production Using a Catalytic Melt

Manxi Xiong, Michael G. Mazzotta and Mahdi Abu-Omar	Reactivity of (PNN)ReI(O) ₂ with Biomass-Derived Model Compounds
Shou Zhao and Mahdi Abu-Omar	Synthesis of Renewable Epoxy Resin Based on Lignin Derived Triphenylmethane-type Phenols
